# CK 3030 WIDE AREA CARPETKEEPER®

Outstanding clean-air performance,  
in a durable operator-friendly machine

If you are challenged with maintaining large carpeted areas, the 30" CK 3030 Clean-Air Carpetkeeper delivers unmatched vacuuming performance. High efficiency cleaning performance, clean-air filtration, and a host of operator-friendly features make this the perfect unit for malls, airports, hotels, convention centers, department stores, and hospitals.

The CK 3030 delivers uncompromising cleaning power in a truly user-friendly package. Two high-efficiency vac motors provide 224 cfm, while a four-stage clean-air filtration system removes particles down to .3 microns.

The 1800 rpm brush loosens deep down dirt and revives carpet pile that gets compressed in high traffic areas. Robustly designed and constructed of rotationally-molded plastic, the CK 3030 stands up to the everyday rigors faced by today's cleaning and maintenance professional. Features include five-position brush height adjustment, stainless steel brush shoe, deadman's safety switch, and large rear wheels for effortless transport.

**Storage made simple**  
The CK 3030's handle folds down and the unit can be stood on end for storage.

**Operator-friendly**  
An ergonomically-designed handle with cushioned grips and safety switch are standard.

**Brush height adjustment**  
The CK 3030 has five pile height adjustment settings. The user may change settings with a simple foot pedal.

**Ease of use**  
The CK 3030 tackles large area vacuuming projects with ease. The handle can be adjusted for operator comfort. A 75-foot power cord minimizes interruptions for outlet changes.

**Four stage clean-air filtration**  
The Tornado CK 3030 Carpetkeeper® delivers true clean-air filtration down to .3 microns with 98.36% efficiency thanks to its unique four stage filtration process:

**Stage 1:** Enclosed within the rotationally molded housing is a disposable paper filter bag. This bag makes disposal and replacement clean and efficient.

**Stage 2:** For added filtration Tornado used a bag-in-bag design. The paper filter is enclosed within a durable, reusable cloth filter bag.

**Stage 3:** Each of the two vac motors is fitted with an intake filter for a third stage of filtration.

**Stage 4:** A high-performance filter cartridge is located at the motor exhaust, ensuring clean-air performance.

The combined efficiency of these four stages of filtration delivers clean-air performance that will reward you with cleaner carpets and healthier environment.

## PRODUCT SPECIFICATIONS

MODEL	CATALOG NUMBER	BASE DIMENSIONS (H X W X D)	BASE CONSTRUCTION	HANDLE LENGTH	HANDLE	VAC MOTORS (2)	VACUUM
