HEADMASTER® 4000 WET/DRY VACUUMS

HM 4000

TROT-MOP™ 4000

HEADMASTER® 4000 WET/DRY VACUUMS

Mobile, large capacity,
high-speed wet/dry pick-up

The Headmaster® Series of wet/dry vacuums from Tornado delivers on power, performance, and reliability. An industry leader in rotationally-molded design, Tornado has created a large-capacity wet/dry vacuum that stands up to the most challenging environments and operating conditions. Whether cleaning up after a floor has been stripped, scrubbed, or even flooded, the Headmaster® Series are the units of choice for high-speed, large-volume recovery.

The Headmaster® 4000 Series is available as a traditional wet/dry vacuum or as an efficient Trot-Mop™ model with a two-way, 28" squeegee. Both units come standard with 21-gallon T-Lite™ roto-molded tank, four-wheeled transport, 1.1 HP lift-off power module, 1.5" drain hose, and 50' power cord.

Trot-Mop™ 4000

The Trot-Mop™ version comes with a 28" two-way squeegee that rapidly recovers high-volume liquids. Twin squeegee blades gather solution forward and reverse, through the hose and into the 21-gallon poly tank. The squeegee mechanism is free-floating for smooth, rough, or uneven surfaces.

Uncompromising power
Each unit in the Headmaster® 4000 series is fitted with a 1.1 HP power module.

Complete package

The Headmaster® Trot-Mop™ 4000 comes standard with a wet filter. The standard Headmaster® 4000 includes both a wet filter and dry filter. The filters are placed over the float cage, which shuts off unit operation when the tank reaches capacity to protect the vac motor.
