HD 651 ELECTRIC-POWERED PRESSURE WASHER

The power of high-pressure cleaning, durable, mobile, and easy-to-use

The HD 651 is an electric-powered, cold water pressure washer designed for commercial-grade applications. These include buildings and grounds maintenance, pool decks, sidewalks, golf carts, service vehicles, and other commercial uses. Low-pressure chemical injection, infinitely variable detergent metering system, on-board chemical tank and triple changeover pressure wand provide the operator maximum flexibility. Pressure is infinitely adjustable between 300- and 1500 psi. The 1.85-gallon, corrosion-resistant detergent tank is built directly into the unit for added convenience. The triple changeover nozzle has settings for pencil jet, fan jet, and chemical injection.

The brass cylinder head, three piston steel pump, pressure switch, and hydro-dynamic seal lubrication have been included in the design for increased efficiency and service life. The pressure switch automatically shuts off the motor when the trigger gun is released. An overflow safety valve protects the unit against excessive high pressure. The high-pressure hose rotates in the trigger gun, eliminating twists and loops, an annoying problem often seen in competitive units.

The HD 651 has a patented, one-piece motor pump housing that encloses an air-cooled single-phase 2.3 HP motor. As a commercial-grade unit, the 651 requires 20-amp service and a 20-amp wall outlet. The unit features a rugged transport handle with aluminum reinforcements, high pressure hose, trigger gun, and spray wand. The two large transport wheels negotiate stairs and other challenges with ease.

HD 651

Smart features

The pressure gauge is located in the trigger gun and allows continuous monitoring of the operating pressure. Releasing the trigger during operation shuts off the motor, eliminating pump and motor damage seen in competitive units.

Versatile

The HD 651 is appropriate for a wide variety of commercial applications, from power washing sidewalks and walls to maintaining vehicles and other equipment.

PRODUCT SPECIFICATIONS

MODEL	CATALOG NUMBER	OPERATING PRESSURE (INFINITELY VARIABLE)	MOTOR	WATER FLOW VOLUME (INFINITELY VARIABLE)	MAXIMUM WATER SUPPLY TEMP.	SERVICE AND OUTLET REQUIREMENTS	WEIGHT	SIZE (L X W X H)
HD 651	97225	300-1500 PSI	2.3 HP	1.1-2.3 GPM	140° F	20 AMPS	58.4 LBS.	16" X 13" X 35"

STANDARD ACCESSORIES AND ATTACHMENTS

(Included with unit)

MODEL	50' HIGH PRESSURE HOSE	TRIGGER GUN (with PRESSURE GAUGE)	SPRAY WAND (STAINLESS STEEL)	TRIPLE CHANGEOVER NOZZLE
HD 651	K6390057	K4775296	K4760356	K4763164

OPTIONAL ACCESSORIES

MODEL	DIRTBLASTER NOZZLE	50' EXTENSION HOSE (REQUIRES 4403002)	HOSE COUPLER
HD 651	K4763931	K6390010	K4403002
