WINDSHEAR™ 3000 BLOWER / DRYER

WINDSHEAR™ 3000

WINDSHEAR™ 3000 BLOWER/DRYER

Designed from the ground up,
simple innovation in an economic package

WINDSHEAR™ 3000 BLOWER/DRYER

Designed from the ground-up by Tornado engineers, the Windshear™ 3000 Blower/Dryer combines innovation, rugged construction, and common-sense design in an economic package. The Windshear™ is the answer for drying carpets, upholstery, or hard floors.

This go-anywhere unit is a durable, rotationally-molded dryer with sensible features and unmatched professional performance. The Windshear™ is perfect for use after fire, flood, or other water damage as well as for drying wet floors during rainy or snowy seasons. The Windshear™ is also appropriate for general air circulation in almost any facility.

The motor is mounted at four points instead of a typical three-point mounting. This design serves to reduce noise and vibration as well as increase the machine's life. A three-speed switch permits airflow selection of 1600, 2000, and 2500 cfm. Airflow may be directed at three angles (0, 30, and 90-degrees), and the units are stackable for easy storage.

WINDSHEAR™ 3000

Carrying handle and cord wrap
A handle is molded-in for easy transport. The power cord can be conveniently stored when the Windshear™ is not in use.

Three-angle adjustment

Angle adjustment is a built-in feature of the Windshear™. The unit's contours have been designed to permit operation at three angles. Screw in height-adjustment feet, which often get bent or lost, are eliminated. Four rubber shoes absorb vibration and provide stability. Place the unit flat for drying floors or at a 30 or 90-degree angle for drying walls or general air circulation.

Stackable storage

Space-efficient storage is simple in corners or closets thanks to molded-in stacking ribs.
